

## **Laminar Flow and Fume Hoods**

To ensure that the hood is adequately designed to handle the research for which it is being used, Environmental Health and Safety must approve all chemical fume hood, biosafety cabinets and laminar flow clean bench purchases. In addition, all vented hoods must be approved by Facilities Engineering.

**End User/Unit/FTC/BSC:**

The requisition is processed normally. A notation that this is a laminar flow and/or fume hood is entered on the requisition. Individuals should contact EH&S for their advice before submitting the requisition or pre-approval.
